PROFESSIONAL SUMMARY

Dynamic Frontend Developer and Software Technology student with a passion for architecting high-performance, visually immersive web applications. Specialized in modern UI/UX paradigms, including Glassmorphism and advanced dark-mode interfaces. Expert at bridging the gap between complex backend logic and seamless, responsive user experiences.

TECHNICAL SKILLS

Core Frontend:	HTML5, CSS3 (Flexbox/Grid), JavaScript (ES6+), TypeScript
Frameworks:	React.js, Tailwind CSS, Framer Motion, Bootstrap
Backend & Cloud:	Firebase (Auth, Firestore, Hosting), REST APIs
Tools & Design:	Git, GitHub, VS Code, Figma (UI/UX), Vite

TECHNICAL PROJECTS

BlackBox | Gaming Arena & E-Sports Portal

- Architected a high-intensity "Cyber-Dark" interface using React and Tailwind CSS.
- Engineered a custom real-time booking system and tournament tracker.
- Integrated complex CSS animations to create an interactive "beast mode" experience.

Bata-Inspired E-Commerce Platform

- Developed a scalable footwear store featuring a real-time catalog via Google Firestore.
- Implemented secure multi-method Firebase Authentication (Email/Google).
- Built a persistent shopping cart with advanced state management.

MHM.Dev | Interactive Portfolio

- Designed a personal brand identity featuring Glassmorphic UI and custom components.
- Optimized performance for SEO and speed, achieving high Lighthouse scores.
- Showcased technical versatility through custom hooks and modular architecture.
